13	6/6/2026		Novid	719					Good Afternoon, Brining in unit 719 for it's first ever oil change! Had a couple of things on the list for that truck: 1.Oil Change/Grease general look over after being on the road for 25000 ish km's 2.The Hood seems to be rubbing on the air cleaner lights it's wore through the paint on each side. (see attached pics) 3.Can we have the headache rack door handles adjusted for a tighter seal, water seems to be getting in. 4.Headlight on the driver side casts a weird shadow on low beams might just need adjusting, it doesn't look like the moose bumper or anything is causing the issue from what I can tell 5.I don't know if it's possible to adjust the programing but driver said that when using the cruise and you go down hill the jakes don't kick in till it's overspeed x amount, but would like it to kick in sooner (driver said 2kph over). 6.He also mentioned that he feels like the jakes still work in stages despite being on the full setting. (maybe that's how it's supposed to work, and I just need explanation on how the system works) 7.I don't know if you guys do this but there's a chip in the windshield maybe we can get filled so it doesn't splinter. Driver is off next week so we'd drop it off tomorrow and like to pick it up Thursday Noon if possible.

57	6/8/2026		Jim Braun						A/C not working	
58	6/8/2026		Novid	706					Hey all, We took 706 for an alignment, we're brining it back to KK tomorrow to get two steer tires put on it, then hoping you guys can take a look at it for: 1. There's no A/C in the truck, just blowing warm air 2. Looks like there's an small oil leak front left maybe oil pan or filter tube 3. Headache rack doors are loose and handles are in rough shape so would like to take a look at getting those tightened up 4. There is some aftermarket extension mirrors made of aluminum tubing it got bent once awhile back but it kind of binds up at the end of the extension, wondering if we can maybe shave the inner tube down a little more so it slides easier or worse case scenario replace it. Would like to pick this one up next Thursday as well if possible. Thanks
